PROFESSIONAL SUMMARY

Data Science graduate student with hands-on experience in data visualization, database management, and analytics across sustainability, conservation, and agriculture sectors. Proficient in Python, R, SQL, Excel, and Power BI, with a track record of building dashboards and data pipelines that support strategic decision-making.

EDUCATION

Willamette University

Master of Data Science.

Aug 2026

Willamette University

Bachelor of Science in Data Science. Minor: Environmental Science.

May 2026

EXPERIENCE

Sustainability Intern

May 2026 – Present

Keck Medicine of USC

Los Angeles, CA

- Design, build, and maintain interactive Power BI dashboards synthesizing 5 years of historical organizational data to provide leadership with actionable insights for strategic decisions.
- Extract and clean complex datasets using advanced Excel functions including Power Query, VLOOKUPS, and Pivot Tables to ensure 100% data integrity prior to visualization.
- Develop and execute web scraping workflows to gather external and internal organizational data, expanding the company's data repository for market analysis.
- Restructure 5 years of legacy data into standardized formats, reducing reporting lag and improving data accessibility.

Design Technology Intern

May 2025 – Aug 2025

Los Angeles County Sanitation District

Los Angeles, CA

- Build and manage SQL and Excel databases, ensuring accuracy and consistency across 5 years of historical records.
- Conduct cost-benefit analyses to evaluate data processes and improve efficiency in file management.
- Clean and restructure datasets to reduce errors and improve accessibility for team members.
- Organize and standardize legacy files, verifying data quality to ensure usability for current and future projects.

Research Intern

Jun 2024 – Aug 2024

RegenScore (UC Davis AIFS Fellowship)

Los Angeles, CA

- Develop databases focused on regenerative farming practices, collaborating with industry stakeholders to raise awareness of standards beneficial to sustainable agriculture.
- Design improved questionnaire frameworks using Excel to enhance data collection and strengthen connections between farmers and buyers.
- Build an AI-powered questionnaire to automate the collection of farming practice data, contributing to autonomous agricultural data management.

Conservation Intern

Jun 2023 – Aug 2023

Los Angeles Zoo and Botanical Gardens

Los Angeles, CA

- Conduct comprehensive soil analysis to assess the impact of eucalyptus oils on microbial levels, identifying effects on root distribution, soil acidification, and native plant health.
- Apply R programming, Solvita Soil RepARATION testing, and Lamotte Soil Sampling Kits to execute soil analysis and derive meaningful insights.
- Lead a team of three, overseeing project planning, data collection coordination, and stakeholder communication throughout the conservation project.

ACTIVITIES & LEADERSHIP

Sigma Chi Fraternity

Member

SKILLS

Languages and Tools: Python (Pandas, NumPy, Matplotlib, Machine Learning), R (ggplot2), SQL (PostgreSQL, database creation), Excel (Power Query, VLOOKUPS, Pivot Tables), Power BI

Competencies: Data visualization, Database management, Web scraping, Data cleaning and wrangling, Cost-benefit analysis
